

SECURITY CHAUFFEUR TRAINING

COURSE OVERVIEW

The Blue Mountain Chauffeur Driver Training course is delivered by our team of specialist driving instructors who develop, deliver and continually refine a range of professional driving courses. The course aim is to develop the skills, techniques and tactics required for safe and efficient driving for a wide range of operational requirements. Typical attendees include security chauffeurs, close protection operatives, commercial/fleet drivers and professionals who require specialist driving skills.

Courses are delivered by highly experienced former emergency service and military instructors, whose expert knowledge and wide-ranging practical skills are delivered with passion and enthusiasm, to ensure our students become the best drivers they are able to be.

Please note that any of our driver training courses can incorporate a RoSPA driving assessment (the highest UK driving accreditation). Completion of this award may attract insurance benefits.

As an employer, these enhanced driving skills will help to: lower company insurance costs; reduce fuel and vehicle maintenance costs (as a result of more efficient vehicle control), increase the safety of your employees by reducing the likelihood of them being involved in road traffic accidents, and reduce the likelihood of third party claims being made against your company. In addition, this course will help to ensure corporate legal responsibilities are met.
